MESSAGE FROM THE ORGANIZING CHAIRMAN

This course is organized by the Infection Control Association Of Malaysia in collaboration with the Asia Pacific Society of Infection Control. It will be a two week full time program, the course curriculum is designed for full time personnel working in the Infection Control Unit of hospital or for doctors and nurses with supervisory position in the field.

The content of the course includes many aspects of hospital practise: senior staff from many departments will also find the content helpful for work. The course will include material that will help hospitals to meet stipulation on infection control required by the hospital authority.

Prof. Dr Norayati Binti Abd Majid
President, Infection Control Association of Malaysia

COURSE CONTENT

- This is an intensive course with classroom setting, consisting lectures and tutorials (course contents will be provided).Participants are also expected to visit some critical departments in the hospital to familiarize themselves with these units before attending the course.
- The faculty consists of experienced frontline workers with years of experience in infection control. It includes professionals from many hospitals and experts in related areas. Many of these are intentionally known speakers in their fields.
- Doctors, allied health staff may attend Participants will meet infection control personnel from many hospitals and will have the opportunity to join this infection control network of nurses and doctors. This will allow them to consult one another in their future practice, which is an added advantage for all practitioners in infection control.
- There will be an examination at the end of the course. Participants who are successful in the examination and complete all required course works and assignments with an 80 attendance rate of the classes will be awarded a certificate by the Asia Pacific Society for Infection Control and Infection Control Association of Malaysia.
